

**Appendix: Evaluation Plan - MOBILWEAT**

This evaluation plan below describes the ways in which the project management will collect and analyze data. The KPIs values and method of measurement below are regrouped in 5 main categories:

- the quality of S&T activities;
- the project impact on the engagement of young people in S&T activities;
- the direct project results;
- the TTT impact;
- the reported project dissemination activities and outcomes.

<b><i>Impact indicators and targets</i></b>	<b><i>Indicator value (KPI)</i></b>	<b><i>Method of measurement</i></b>
1. Measurement of the quality of S&T activities	Level of awareness and knowledge about how S&T interweave. Developing a minimum of 3 current courses further by incorporating more science aspects(one/year). Developing a minimum of 3 new courses in deep science subjects (one/year).	Regular teacher surveys in the participating schools
2. Measurement of the project impact on the engagement of young people in S&T activities	1. Increasing the number of young people interested in S&T	The main source of information will be evaluation reports (mid-term and final) based on results from teacher surveys in the participating schools
	2. Boosting gender equality in S&T	
3. Measurement of the direct project results	1. Increasing the number of young people participating in S&T activities	Lists of participants
	Goals: First year: Minimum of 760 attendances Second Year: Minimum of 1260 attendances Third Year: Minimum of 1800 attendances	
	2. Increasing the number of girls participating in S&T activities	
	3. Increasing the number of localities served	Annual organization plans
Goals: First year: Minimum of 9 locations Second Year: Minimum of 15 locations Third Year: Minimum of 18 locations		

	4. Increasing the number of S&T activities offered	
	Goals: First year: Minimum of 90 activities Second Year: Minimum of 150 activities Third Year: Minimum of 180 activities	
<b>Impact indicators and targets</b>	<b>Indicator value (KPI)</b>	<b>Method of measurement</b>
4. Measurement of the TTT impact	Increasing the number of trained teachers and educators.	List of participating teachers and educators
	Increasing the number of people interested in teaching S&T activities	Survey for participating teachers and educators
5. Measurement of the reported project dissemination activities and outcomes	Increasing the number of visitors (web platform, social networks,...)	Online visitor counter
	Regularly update the project website and have regular media coverage	Catalogue of all project publications
